AMENDMENTS TO THE SPECIFICATION

IN THE SPECIFICATION:

Page 3

Please amend paragraph [0007] to read as follows:

[0007] As described in Patent Document 3 (JP 2000-100621-A) (JP 2001-100621-A), there is

known a method in which the shape made of the photosensitive material is molded with a resin

such as epoxy resin or a metal by electrotyping and then transcribed onto another transparent

material. Bichromic acid gelatin, acrylic monomer-containing compounds and photoresists are

used as the photosensitive material. The transparent materials are, for example, thermoplastic

resins such as acrylic resins.
